

Levi, S. (1974), Some magnetic properties of magnetite as a function of grain size and their implications for paleomagnetism, Ph.D. Thesis, University of Washington, Seattle, Washington, 210 pp.

<i>Table of contents</i>	<i>page</i>
List of abbreviations	v
List of definitions of symbols	vi
List of figures	ix
List of tables	xiii
Acknowledgements	xiv
1 Introduction	1
2 Description of the magnetites	14
3 Sample preparation	35
4 Sample description and TRM properties of prepared samples	42
5 The field dependence of TRM stability against alternating field, A. F., (and) thermal demagnetization	52
6 The temperature dependence of some stability parameters in magnetites	68
7 On the additivity of partial thermoremanence (PTRM)	98
8 The use of magnetites for paleointensity determinations	110
9 Comparison of ARM and TRM stabilities in magnetites	150
10 The effect of magnetite interactions on the acquisition and stability of ARM and TRM	171
References	194
Appendix A: Conversion of some magnetic quantities from c.g.s. to S.I. system of units	203
Appendix B: Experimental procedures and measuring techniques	205
